

ATS can provide educational programming to your school and/or a full line up for student housing. In new buildings we can wire cable TV to every room or retrofit existing buildings to include cable hook ups wherever needed.

At ATS we understand that moving students don't need the hassle of setting up complicated equipment, with a simple plug and view system your students will be able to view their favorite shows the minute there moved in.

Costs are always an issue for students and having their cable included in their dorm fees will alleviate the need for maintenance personnel to let cable installers into the building and the student having to add one more bill to their already expensive college education.
